Michael Binder

Lead UX Designer | Accessibility & AI Specialist

(760) 208-0433 | mike@innersprk.com | innersprk.com | linkedin.com/in/innerspark/

Summary

I've been deep in UX for over 20 years now, building websites and apps that people can actually use without frustration, no matter the industry. I get fired up about solving complex user problems, always prioritizing what real users truly need, and pulling in new technology like AI to make products better, faster and smarter.

I'm certified in accessibility (IxDF's "How to Design for All") and UX management/strategy. I've led teams, pushed WCAG-compliant work, grown design systems that actually scale, and delivered products that move the needle, like 20-40% efficiency gains on big enterprise tools. Bottom line: I want to ship digital products that help people get things done and make companies money in the process.

Experience

Sr. UX Designer | Dun & Bradstreet · Business Information / Data Analytics
July 2022 - Present

- Led research and redesign efforts on D&B Hoovers (our B2B sales intel platform). Cleaned up workflows so sales reps prospect 28% faster.
- Pushed accessibility company-wide: wrote guidelines, started the accessibility working group, drove WCAG standards everywhere, in doing such I cut accessibility issues by 40% and got people actually caring and talking about inclusive design daily.
- On the Design System Governance Board: I helped evolve a solid, accessible enterprise system that works now and scales for whatever comes next.
- Mentored designers and cross-functional teams on WCAG and inclusive principles. This helped team's accessibility knowledge go up, and the product quality improved.
- Co-led our AI integration push: added prospect scoring, smart search, intent data, generative tools. This sped up prospecting by 20-30% and helped revenue grow.

Lead Product Designer | Ozmo · Tech Support / Customer Experience Software
October 2021 - June 2022

- Mentored a team of designers across multiple products, guiding high-quality deliverables and professional growth.
- Teamed up with product to improve platform usage. Boosted adoption 20% and made users more efficient.

- Built cross-departmental relationships to align design efforts with organizational goals and foster collaboration.
- Handled user research (personas, competitive stuff, usability tests, A/B). Turned findings into decisions that bumped satisfaction scores 20%.
- Ran design workshops to fix processes and make our team workflow smoother.

Lead UX Architect | Realogy · Residential Real Estate Services
September 2020 - October 2021

- Led the UX design for a new enterprise Lead Management platform that empowered real estate agents and brokers to capture, nurture, and convert high-volume leads efficiently across major brands (Century 21, Coldwell Banker, Sotheby's International Realty, ERA, etc.), increasing lead conversion rates by 20%.
- Aligned cross-functional teams on user-centered principles. Turned complex needs into simple wireframes, flows, interfaces that cut task time 30% by reducing mental overload.
- Conducted and moderated user testing with agents and stakeholders. I synthesized feedback into fixes and iterations and was able to get 90%+ alignment on launches.
- Facilitated design workshops and alignment sessions to synchronizing requirements, vision, and execution among product, engineering, sales, and operations teams for a successful product delivery.

Head of User Experience | iBASEt · Manufacturing Execution Systems
April 2015 - June 2020

- Owned UX end-to-end for Solumina iNEXT/iSeries (flagship MES for aerospace/defense/precision manufacturing). Led full redesign from concept to launch: modern, intuitive, responsive UI with 80%+ shop-floor adoption in Q1.
- Built and maintained a scalable design system. Kept UI/UX consistent which cut bugs 40% and sped up dev.
- Built and led a solid UX design team where we cultivated collaboration with customers, product owners, developers, implementation teams, and end-users to deliver solutions aligned with rigorous industry standards.
- Defined and drove responsive, multi-device UX strategy supporting desktops, tablets, touchscreens, mobile, gloved/cleanroom operations, and emerging inputs (e.g., augmented reality), dramatically improving shop-floor productivity by 40%.
- Collaborated to rethink complex manufacturing flows into simpler, error-resistant designs. Dropped errors 20%, sped up critical tasks in high-stakes settings.

Education

BS, Interactive Media Design The Art Institute of California - Orange County - 2006

Certifications

December 2023
Accessibility: How to Design for All – Interaction Design Foundation (IxDF)

July 2022
UX Management: Strategy and Tactics – Interaction Design Foundation (IxDF)

Skills

Design:
Ideation, Concept Development, Information Architecture, Design Systems, Wireframing, Prototyping (Low to High Fidelity), Mockups (Figma, Sketch, Adobe XD), Typography, Color Theory, Visual Hierarchy, Layout Design, Mobile-First Design, Responsive Design, Branding, Style Guides, Accessibility (ADA/WCAG Standards)

Technical:
HTML, CSS (Responsive Design), JavaScript, Front-end Development (PHP, Ruby on Rails, XML, Node.js), Prototyping Tools (Figma, Axure), Adobe Creative Cloud (Photoshop, Illustrator, InDesign, Dreamweaver), Component Libraries, Design Tokens, Version Control (GitHub, Zeplin, Storybook)

Research & Strategy:
Quantitative Research, Qualitative Research, User Interviews, Usability Testing, Heuristic Evaluation, Persona Creation, Journey Mapping, User Flows, Task Analysis, Data & Content Review, User Stories, Requirements Gathering, A/B Testing, Feedback Analysis, Competitive Analysis
